

MY PROFILE

Hello! My name is Loredana-Ioana Drăgan and I am a Fronted Developer by choice and UI/UX Designer by nature.

Born and raised in Brad, Hunedoara, I've been established in Cluj-Napoca since I've been a student. With a background in Architecture (absolvent from the Highschool and Art "Sigismund Toduță" Deva), a license and master degree in Design (obtained from University of Art and Design Cluj-Napoca) and a current career in UI/UX design, I've decided to break the barriers and study programming.

In love with technology and what I was doing in design on this area, I've managed to become a student at Informal School of IT from Cluj-Napoca (Fronted Development). Here I started to understand more about Frontend, about programming and how to build responsive web applications.

Currently I am still learning (quoting Michelangelo) and I am looking forward for the future and what amount of information is there to be discovered through learning.
